- [Research Paper: A Review on Fall Detection Systems Using Data from Smartphone Sensors.](#)
- 1st runner up in math quiz arranged by Math club, KUET.

MAJOR PROJECTS:

- **TOKEN TRADE** Spring Boot, Java [link](#)
Currently developing a blockchain-based cryptocurrency and token trading website in my present company. Responsibilities include backend design and implementation using Spring Boot, Java, and RESTful APIs, and collaborating with a team to ensure project success.
- **Undergraduate Thesis: Bangla Sign Language Recognition Using Deep Learning.**
Deep Learning, CNN, Python, Tensorflow, OpenCV
Proposed a Hybrid Transfer Learning based CNN model with RandomForest classifier to classify Bangla sign characters and digits from Images.
- **DiceRoll** AndroidStudio, Kotlin [github](#)
This is a simple Android app that can perform dice roll by clicking on a button.
- **CatchTheBall** CodeBlocks, C++, OpenGL [github](#)
A graphical game to catch the balls falling from top by moving a basket.
